Sri Maruthi Pharma in Bangalore is one of the leading businesses in Surgical Equipment Dealers. Also known for Surgical Equipment Dealers, Pharmaceutical Product Distributors, Medical Equipment Dealers, Pharmaceutical Distributors, Surgical Item Dealers, Medicine Distributors, Medical Product Dealers, Generic Medicine Wholesalers and much more. The main objective of this project is to learn the implementation of HTML, CSS, JavaScript, MySQL, and PHP. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS. Here we have done a SRI MARUTHI PHARM Company page using a Frontend and Backend development

This webpage is about tool or device for performing specific actions or carrying out desired effects during a surgery or operation, such as modifying biological tissue, or to provide access for viewing it. Over time, many different kinds of surgical instruments and tools have been invented. Here we has a team designed a Landing page using HTML, CSS, JAVASCRIPT, MySQL and PHP, Landing page contain the about the company, service offered by Bionic Engineerings company, whats app chat both, contact page. The contact section has been linked to Database using PHP.

<h3>Scalpel</h3>

A scalpel, or lancet, or bistoury, is a small and extremely sharp bladedinstrument used for surgery, anatomical dissection, podiatry and various arts andcrafts (called a hobby knife). Scalpels may be single-use disposable or re-usable.Re-usable scalpels can have permanently attached blades that can be sharpened or,more commonly, removable single-use blades. Disposable scalpels usually have aplastichandlewithanextensibleblade(likeautilityknife) andareusedonce,thentheentireinstrumentis discarded.Scalpelblades areusuallyindividuallypackedin sterile pouches but are also offered non-sterile. Double-edged scalpels arereferredtoas "lancets".

ABOUT
WHO WE ARE
We provide surgical instrument. A surgical instrument is a tool or device for performing specific actions or carrying out desired effects during a surgery or operation, such as modifying biological tissue, or to provide access for viewing it. There are several classes of surgical instruments:
Learn More
Graspers, such as forceps
Clamps and occluders for blood vessels and other organ
Surgical scissors
Bone cutters: unpowered or powered saws, drills and pliers-like devices
Retractors, used to spread open skin, ribs and other tissue
Needle drivers, also known as needle holders, used to hold suture needle while it is passed through tissue and to grasp suture while instrument knot tying.

WHAT ARE DEALING IN:
Chemists
A chemist (from Greek chēm(ía) alchemy; replacing chymist from Medieval Latin alchemist)[1] is a scientist trained in the study of chemistry. Chemists study the composition of matter and its properties. Chemists carefully describe the properties they study in terms of quantities, with detail on the level of molecules and their component atoms. Chemists carefully measure substance proportions, chemical reaction rates, and other chemical properties. In Commonwealth English, pharmacists are often called chemists./p>
